FOR IMMEDIATE RELEASE

Fulton Launches Thermal Fluid Heater Rental Program

2,400,000 and 6,000,000 Btu/Hr Output Units, with More Sizes to Come

Pulaski, New York — July 25, 2016 — Fulton Thermal Corporation, a global manufacturer of thermal fluid heat transfer products and provider of innovative energy management solutions, is now offering multiple thermal coil heater skids as rental units.

Among their many uses, the units serve customers experiencing failure of an existing heater, as backup for critical processes, or as short-term replacements during long lead times for new units or permanent solutions.

Fulton rental heaters offer all the capabilities of custom-designed Fulton thermal coil heaters. They are ready for use in markets including chemical processing, manufacturing, lamination, food and asphalt industries, and are currently available in two models: FT-0240C and FT-0600C.

The FT-0240C model has a 2,400,000 Btu/hr output, a 198 GPM flow rate, dual-gas (natural gas/propane) capability, and can ship closed-truck LTL. The FT-0600C model has a 6,000,000 Btu/hr output, 375 GPM flow rate, dual-fuel (natural gas/#2 oil) capability, and low emissions at sub 15 PPM NOx on natural gas.

Both models are completely turnkey products (install it, connect power, gas, and thermal fluid and it's ready to run), are rated NEMA 4 for outdoor installation, and include an exhaust stack, circulating pump and expansion tank.

For additional information about Fulton's rental heater program, please visit www.fulton.com/rental or call 315-298-5121.

Fulton Thermal Corporation

With manufacturing facilities in the United States, Great Britain and China, Fulton Thermal is a global manufacturer of thermal fluid heat transfer systems. Backed by over 40 years of research, innovation and experience, Fulton Thermal is building on a tradition of success and is focused on improving life through heat transfer solutions.
